

Create circular openings

Tutorial	
Name:	Create circular openings
Description:	Circular openings may be created within area objects, and the surrounding mesh may be improved.
Program:	SAP2000
Version:	all
Model ID:	na

This tutorial is for SAP2000, but similar concept applies also to CSiBridge.

Guidelines for **creating a circular opening** and [meshing](#) the surrounding [shell](#) object are outlined in this tutorial. While demonstration follows the modeling of a circular opening, the concept and procedures also apply to openings of other shapes.
