

# Export

Resources associated with **export** from [CSI](#) Software are typically product-specific. Articles in product spaces may be most useful.

- [SAP2000 Export](#)
- [ETABS Export](#)

## NOTE:

- To copy only a portion of a model, then reproduce that section in another model, select the objects to be copied, then select Export > Text File. This will create a text file which may then be imported into the destination model when selected through Import > Text File.
