Center-of-gravity determination

Tutorial	
Name:	Center-of-gravity determination
Description:	The process for determining center of gravity is given in this tutorial.
Program:	SAP2000
Version:	12+
Model ID:	na

This tutorial provides guidelines for determining the **center-of-gravity** of a structural system. A notable feature of SAP2000 is the ability to include assigned loading with the self-weight during calculation. This tutorial is useful for determining the *pick points* used to transport and erect modular structures.
