

Import Rhino or Grasshopper into SAP2000

To **import from Rhino or Grasshopper into SAP2000**, models should first be [imported](#) into [Industry Foundation Classes](#) (IFC), or another intermediate format. Models may then be imported from IFC into [SAP2000](#).

A list of file formats suitable for import into SAP2000 is available within the software interface by selecting File > Import.

Model data may also be selectively imported on a table-by-table basis using [interactive database editing](#), available through Edit > Interactive Database Editing.

Third-party Rhino / Grasshopper plugin

A [plugin](#) is available through the Geometry Gym website which enables import from Rhino or Grasshopper into SAP2000. [CSI](#) is not affiliated with the plugin developer, we do not endorse or promote its use, and we do not provide support for application of the plugin. A link is available below such that you may evaluate the plugin and apply it if you find it useful.
