

ETABS Error FAQ

How do I resolve the “Unable to complete operation Show Tables!” error?

Extended Question: When I try to execute a table display, I receive this error. How is this resolved?

Answer: This issue may be resolved through the following process:

1. Search within the C:\Windows folder for files which have the *.tb2 extension.
2. If present, delete these *.tb2 files.
3. Start [ETABS](#), create a new model using any template, then select Options > Reset Toolbars.
4. Open the original model and execute the necessary tables.

Why am I receiving Runtime Error 6 Overflow?

Answer: When [importing](#) a model into [ETABS](#), ensure that the original model is located near the origin (0,0,0).
